

Innovative RFID Solutions

.....
For Critical Drug Inventory Management
and Processes in Healthcare

From Day One A Commitment to Innovation

Our Background

Every business started somewhere; some from more humble beginnings than others. For MEPS Real-Time, Inc., what started as a brilliant idea originally conceived on an airport napkin has evolved into a paradigm-shifting technology. Intelliguard® RFID Solutions can revolutionize your pharmacy as they have in hundreds of hospital pharmacies.

Headquartered in Carlsbad, CA, MEPS Real-Time, Inc., was originally established as a division of Safety Syringes, Inc. which was acquired by BD (Becton, Dickinson and Company [NYSE: BDX]) in 2012. Today, MEPS Real-Time, Inc. is privately held.

In 2013, the company launched its first Intelliguard® RFID Solution with the Intelliguard® Inventory Management System featuring RFID-enabled Controlled Temperature Cabinets. The Intelliguard® Kit and Tray Management System was commercially released in 2014 with next generation Intelliguard® RFID smart tags specific to anesthesia and procedural kit and tray processing use cases. In 2016, a new paradigm in inventory optimization for the operating room was underway with Intelliguard® Linked Visibility Inventory Stations (LVIS™).

Our Purpose

The vision of MEPS Real-Time, Inc. is to deliver original, innovative RFID solutions that help healthcare providers ensure the right drugs in the right doses are available when and where they're needed. Our current solutions are proven to eliminate errors, improve efficiency and reduce costs related to critical pharmaceutical inventory management and processes in healthcare.

Not All RFID is Created Equal

MEPS Real-Time holds dozens of patents and continues to develop technologies and applications. Of exceptional note, MEPS® has patented two Dynamic Sensor Module™ (DSM) antenna solutions to increase accuracy and reliability of RFID systems. These DSM™ technologies allow us to integrate reliable RFID function into size-efficient, cost-effective kit and tray management workstations, pharmaceutical controlled temperature cabinets and RFID-enabled drawers. Our patented RFID systems operate at the ISM 915 MHz frequency band which allows us to integrate antenna systems into an array of traditionally challenging environments.

Intelliguard® RFID Solutions: Your Prescription for Improved Medication Safety, Reduced Costs and Increased Efficiency

Our suite of RFID solutions enable safe and efficient machine-verified workflows and provide continuous visibility of high-value, critical-dose medication inventory, empowering clients to:

- Optimize inventory management
- Reduce human errors
- Avert medication expiry waste
- Prevent stock-outs
- Enhance workflow efficiency
- Increase patient safety
- Improve caregiver satisfaction
- Meet compliance requirements

Contact us today to learn how Intelliguard® RFID Solutions can give you confidence you'll always have the right drugs, in the right doses, when and where they're needed.

Discover Workflow Automation for Critical Pharmaceutical Inventory

Faster, Safer Kit and Tray Processing

The Intelliguard® Kit and Tray Management System automates, validates and enables medication replenishment processes and is proven to reduce staff processing time and errors.

Controlled Temperature Cabinets: Different Sizes. All Smart.

The Intelliguard® Inventory Management System automatically tracks and monitors critical drug inventory levels and storage conditions. Featuring real-time visibility enterprise-wide, this insight provides actionable data to right-size inventory, eliminate expiry waste, respond to recalls quickly, and avoid stock-outs.

The Anesthesia Drug Management Revolution Is About to Begin!

Intelliguard® Linked Visibility Inventory Stations offer the first OR medication optimization solution that manages inventory in real time at the point-of-care. Learn how you might qualify as an early adopter and get special pricing.
